

AI Use Declaration Form

Course: Introduction to Artificial Intelligence

Lab Title: Lab 1 Part A — Uninformed Search Algorithms

Student Name: _Zahara Seybou

Harouna _____

Student ID: _30862027_____

GitHub Repository Link:

Date Submitted: _20/06/2026_____

1. AI Use Summary

Question	Student Response
Did you use any AI tool for this lab?	Yes
Estimated percentage of the work influenced by AI	20%
Did you attach evidence of AI use where applicable?	Yes

2. Details of AI Use

Complete the table below for each AI tool used. Add more rows where necessary.

Name of AI Tool Used	Purpose for Using the Tool	Prompt or Instruction Given to the Tool	Part(s) of the Work Influenced by the Tool	How I Verified, Edited, or Improved the AI Output
Capilot	To understand some errors	Capilot	Lab part A visualization part	It helped me solving the bugs that are preventing the code from showing the different search path to the goal.
Chat Gpt	To get more knowledge on how drone work in reals life for answering some reflexion questions	How does drone work in real life and what does it use, mention all thing like energy, batery...	Some reflexion questions and the lab in general to give me an idea of how drone works	It helped me to understand the lab in first hand and helped me answer some reflexion question questions related

				to how drone work in real life

3. Attachment of AI Output Evidence

Where required, attach evidence of AI use. Tick all that apply. Add more rows where necessary.

Evidence Type	Attached? (Yes, No, N/A)	File Name
AI-generated draft	yes	In AI use Declaration from below
Prompt history	yes	In AI use Declaration from below
Screenshot of AI interaction	yes	In AI use Declaration from below
Exported AI conversation	Yes	In AI use Declaration from below
AI-generated code snippet	-	It told me the reason but didn't check the code, I just understood the bug
Revised version showing student input	yes	In the code file

4. Student Declaration

I declare that:

Declaration Statement	Response (Yes/No)
The submitted work is my own work.	
Any use of AI tools has been clearly declared in this form.	yes
The prompts, instructions, and AI-generated outputs have been disclosed where applicable.	
I reviewed, tested, edited, and improved any AI-generated content before submission.	Yes,
My AI usage does not exceed 25% of the entire work.	Yes
I understand that undeclared or excessive AI use may be treated as academic misconduct.	Yes

AI prompts:

1. How does drone work in real life and what does it use, mention all thing like energy, battery...
2. why does this statement my show error saying that method success is not defined?
3. why are some reason why this code may refuse to display the result path

```
# 2. If the initial state is the goal, return success.  
if problem.is_goal(node.state):  
    return SearchResult.success(node, algorithm)  
  
# 3. Use a Python List as the stack frontier.
```

This one helped me to solve the others having the same bug
